Dear Valued Customer:

RE: California Proposition 65, Lead and Nazdar's Products

In 2007, Nazdar removed lead from its manufacturing processes. Since that time Nazdar has conducted random lead testing on manufactured products and results have not found lead in appreciable amounts (i.e. less than 50 ppm). Nazdar products can contain other Proposition 65 chemicals as noted on material safety data sheets (MSDSs), however, most of these chemicals are volatile in nature or do not pose an exposure risk on finished printed articles.

Without lot specific testing, Nazdar cannot make any guarantee, however, it is our opinion that articles printed with Nazdar inks would not require Proposition 65 warnings due to lead contamination. Nazdar recommends companies review the Proposition 65 requirements to determine appropriate methods of compliance concerning Proposition 65.

Additional information concerning Proposition 65 can be found at the following web site: <http://www.oehha.ca.gov/prop65.html>. If you have any additional questions please contact Regulatory Compliance at the number listed below.

Sincerely,  
Nazdar
